

BAHAA EDDINE BOUZID

Tunis, Tunisia | +216 55482545 | bahaaeddinebouzid@gmail.com | <https://bahaa-portfolio-dev.vercel.app/> | github.com/Armi64bit | linkedin.com/in/bahaa-eddine-bouzid-webdev

Summary

- Full-stack engineer who has shipped React/TypeScript frontends and Spring Boot backends across two internships and six-plus independent projects, including a live AI-driven trading system processing real-time market data across 15 crypto pairs. Comfortable owning features end-to-end, from REST API design through AWS deployment and CI/CD.

Skills

- Languages:** Java | JavaScript | TypeScript | Python | C/C++
- Frontend:** React | Angular | HTML5 | CSS3 | Tailwind CSS
- Backend:** Spring Boot | Node.js | NestJS | FastAPI | Django | Laravel | Symfony
- Databases:** MongoDB | SQL | NoSQL
- Cloud & DevOps:** AWS (EC2, S3) | Docker | CI/CD | GitHub Actions | Jenkins | Git | Maven | SonarQube | Prometheus | Grafana | Firebase
- Testing:** Jest | JUnit
- AI/ML Tools:** OpenRouter | Gemini AI | Optuna | Prompt Engineering
- Spoken Languages:** English | French | Spanish

Experience

Front-End Developer Intern, Xtendplex Tunisia 02/2025 – 12/2025

- Rebuilt core UI modules of an internal B2B platform in React and TypeScript, reducing page load time by an estimated 20%.
- Refactored 8+ legacy UI components into a shared design system used across 3+ features, cutting new-feature implementation time by an estimated 25%.

Full Stack Developer Intern, IPACT Consult Inc. Remote (Canada) 06/2024 – 08/2024

- Built a customizable Andon dashboard in AngularJS and Spring Boot, giving production teams real-time visibility into 5+ line metrics.
- Raised system reliability by writing unit and integration tests covering core dashboard features, and authored technical documentation adopted team-wide.

Mobile Developer, Denim Authority Tunisia 06/2023 – 07/2023

- Launched a Flutter/Firebase e-commerce app with full backend integration, enabling end-to-end purchase flows for early users.

Freelance Full-Stack Developer, Self-employed Remote 2018 – Present

- Delivered production web applications in React, Angular, Spring Boot, and Node.js for multiple clients, integrating REST APIs and building responsive, cross-device interfaces.

Projects

- Interactive Personal Portfolio (2026):** Designed and engineered a fluid, dark-mode developer portfolio featuring custom motion physics and interactive drag-and-scroll mechanics. Optimized multi-device responsiveness and integrated an asynchronous contact form to streamline inbound inquiries. Stack: React, TypeScript, Tailwind CSS, Framer Motion, Vercel.
- Lilac-AiTrader (2026):** Engineered a self-improving AI crypto trading bot with a FastAPI backend and React/Tailwind dashboard, integrating CCXT for live Binance market data across 15 crypto pairs. Architected 4 ensemble trading strategies with a dynamic weighted-voting system, automated hyperparameter optimization via Optuna, and deployed via GitHub Actions to Railway and Vercel. Stack: FastAPI, React, Tailwind, CCXT, Optuna.
- B2B Hub Platform Revamp (2025):** Modernized a B2B platform's frontend by migrating to React and TypeScript under Atomic Design principles, cutting component duplication by an estimated 30%. Stack: React, TypeScript.
- DevOps Automation Project (2024):** Built a Spring Boot + Angular application with a full CI/CD pipeline, reducing manual deployment steps by an estimated 70%, and added Prometheus/Grafana monitoring. Stack: Spring Boot, Angular, Docker, Jenkins.
- Tektai (2024):** Developed an ML collaboration platform improving API response times by an estimated 25% through backend query optimization. Stack: React, Node.js, NestJS, MongoDB.
- ZeroWaste – Sustainability & Recycling Platform (2024):** Built a React and Laravel platform for discovering recycling centers, learning eco-friendly practices, and joining community events, featuring an interactive GPS recycling map, semantic search, Stripe payments, a dynamic cart, email notifications, educational and categorized content, comments, and sustainability challenges. Developed in association with ESPRIT (Sep–Nov 2024). Stack: React, Laravel, Stripe, GPS.
- Artfulio – Artist Community Platform (2023):** Developed a cross-platform social network for artists to share their work, connect with creators, and grow their portfolio's visibility, with social interactions, portfolio sharing, and real-time feedback features, in association with ESPRIT. Stack: HTML, CSS, JavaScript.

Education

ESPRIT – Private Higher School of Engineering and Technology Tunisia 2020 – 2025

- Software Engineering Degree, Web & Internet Technologies:** Five-year engineering program focused on web and internet technologies, covering full-stack development, software architecture, and modern deployment practices.
